AUSTRALIAN DECIMAL CURRENCY

On 14 February 1966, under the *Currency Act 1965*, a dollar/cent decimal currency system, with one dollar equal to 100 cents, was introduced in Australia. \$2 in the new currency are equivalent to £1 in the old.

In this publication all monetary amounts are expressed in dollars. Where necessary, monetary amounts that were originally expressed in the old currency have been converted to the equivalent amounts in the new system.

Coverage of Statistics

The particulars given in Divisions 2 to 5 of this Part are confined to operations on rural holdings of one acre or more used for commercial production of livestock and/or crops. Commercial poultry farming and commercial bee-keeping are included, however, even though the holding may be less than the stipulated one acre. Livestock kept on reserves etc. by owners who occupy no holding are also included.

Period Covered

Data relating to areas sown and production are in general for crops harvested during twelve months ended 31 March. Owing to seasonal differences, however, some variations have been made to this general rule. The actual period covered by the 1965-66 figures is shown for each crop in Table 18 on page 21.
